EDUCATION

Dublin City University | Glasnevin D11 **May 2027**
Bsc in Computer Science 1:1

- Relevant Courses: Logic, Object Oriented Programming,Artificial Intelligence, Linear Algebra, Comparative Programming Languages, Advanced Algorithms, Full Stack Development, Probability and Statistics

Limerick College of Further Education | Musgrave St, Limerick **December 2021**
Introduction to *Computer Programming QQI L5*

PROJECTS

Full C Shell Terminal with Commands
Technologies: C, Unix/Linux APIs

- Developed a custom Unix shell from scratch in C.
- Implemented core features including command parsing, piping, I/O redirection, background process handling, and signal management.
- Enabled execution of both built-in and external commands with robust error handling.

County Akinator AI App
Technologies: JavaScript (ES5), Node.js, Express, React, Gemini API, ChatGPT API, DeepSeek API

- Built a full-stack web app that plays an Akinator-style guessing game for world counties, using custom selection algorithms and three AI models (Gemini, ChatGPT, DeepSeek) to progressively narrow down the user's county.
- Integrated Gemini as an adjudicator to score which AI provided the most accurate and efficient guesses.
- Designed and deployed the system within an Einstein environment for real-time inference, enabling seamless interaction between the AI services and the user interface.

AI Sign Language Interpreter
Technologies: Python, TensorFlow/PyTorch, OpenCV

- Collected and preprocessed a dataset of hand gestures captured via webcam.
- Trained a deep learning model to classify and track hand movements in real-time.
- Deployed the model in a lightweight Python app to Identify ASL letters

EXPERIENCE & ADDITIONAL INFO

Dublin City University– *UN Sustainable Development*
Infrastructure Developer **April 2025 – Present**

- Faculty of Computing led initiative under supervision of Prof. Hyowon Lee to support UN sustainable development Goal 8 (Decent Work and Economic Growth)
- Developed Cabhar, an end to end platform empowering workers in developing countries to anonymously report workplace exploitation
- Developed core infrastructure for AI-driven complaint triaging, routing reports by severity/type to relevant NGO's and local authorities
- Presented platform to DCU UN development partners as potential digital solution

- DCU Debate Society Committee Member
- DCU Rugby Club Forwards Captain
- Phonewatch Munster Sales Representative
- UL Cyber Security Camp
- 4 Years Experience Customer facing as Bartender/Waiter

TECHNICAL SKILLS

Languages: Python, Java, C, C++, SQL, JavaScript, Kotlin
Frameworks/Libraries: React, Node.js, TensorFlow, Pandas, Android SDK, Django
Tools: Docker, Git, Gradle, MongoDB, N8N
Methodologies: Agile, Test-Driven Development, CI/CD
