EDUCATION

Dublin City University **May 2027**
BSc in Computer Science – 1:1 Glasnevin, Dublin 11

- Relevant Courses: Logic, Object Oriented Programming, Artificial Intelligence, Linear Algebra, Comparative Programming Languages, Advanced Algorithms, Full Stack Development, Probability and Statistics

Limerick College of Further Education **December 2021**
Introduction to Computer Programming QQI L5 Musgrave St, Limerick
Completed whilst in Leaving Certificate

PROJECTS

Lámha – Craicathon Hackathon – Create It Track Winner
Technologies: Python, TensorFlow, OpenCV, MediaPipe Hands, KNN Classifier

- Built Lámha with my team, an award-winning tool bridging Irish Sign Language (ISL) and Irish-speaking communities, allowing ISL speakers to communicate as Gaeilge; developed as part of team fadófadó at the Craicathon Irish Language Hackathon at Dogpatch Labs.
- Implemented CNN-powered real-time hand gesture and feature recognition to classify ISL signs with high accuracy via camera input.
- Integrated MediaPipe Hands for landmark detection and a custom KNN classifier, enabling fully local, in-browser inference with no paid APIs.

Full C Shell Terminal with Commands
Technologies: C, Unix/Linux APIs

- Developed a custom Unix shell from scratch in C with command parsing, piping, I/O redirection, background process handling, and signal management.
- Enabled execution of both built-in and external commands with robust error handling.

County Akinator AI App
Technologies: JavaScript (ES5), Node.js, Express, React, Gemini API, ChatGPT API, DeepSeek API

- Built a full-stack web app that plays an Akinator-style guessing game for Irish counties, using custom selection algorithms and three AI models (Gemini, ChatGPT, DeepSeek) to progressively narrow down the user's county.
- Integrated Gemini as an adjudicator to score which AI provided the most accurate and efficient guesses.
- Designed and deployed the system within an Einstein environment enabling seamless interaction between AI services and the user interface.

EXPERIENCE & ADDITIONAL INFO

Dublin City University – *UN Sustainable Development* **April 2025 – September 2025**
Infrastructure Development Assistant

- Faculty of Computing led initiative under supervision of Prof. Hyowon Lee to support UN Sustainable Development Goal 8 (Decent Work and Economic Growth).
- Developed Cabhar, an end-to-end platform empowering workers in developing countries to anonymously report workplace exploitation.
- Built core infrastructure for AI-driven complaint triaging, routing reports by severity/type to relevant NGOs and local authorities.
- Presented platform to DCU UN development partners as a potential digital solution.

- DCU Debate Society Committee Member
- DCU Rugby Club Forwards Captain
- Phonewatch Munster Sales Representative
- UL Cyber Security Camp
- 4 Years Experience Customer-Facing as Bartender/Waiter

TECHNICAL SKILLS

Languages: Python, Java, C, C++, SQL, JavaScript, TypeScript, Kotlin
Frameworks/Libraries: React, Node.js, Express, TensorFlow, OpenCV, MediaPipe, Pandas, Android SDK, Django
Tools: Docker, Git, Gradle, MongoDB, N8N
Methodologies: Agile, Test-Driven Development, CI/CD, REST APIs
